SECTION 1: Strategic Positioning (Filled Draft)

1.1 Client Intelligence

Who actually hires you? (approximate understanding)

Real estate developers (residential) **20%**
Real estate developers (commercial) **10%**
Hospitality groups (hotels, resorts) **10%**
Corporate clients (office buildings, campuses) **15%**
Government/institutional bodies **5%**
High-net-worth individuals (private residences) **20%**
Industrial/manufacturing companies **10%**
Healthcare organisations **5%**
Educational institutions **3%**
Other (mixed-use / experiential projects) **2%**

Of these, which 2–3 client types would you like MORE of?

- High-net-worth individuals (private residences with strong design intent)
- Hospitality & experiential projects (resorts, boutique hotels, retreats)
- Healthcare & institutional projects (where design impacts human wellbeing deeply)

1.2 The Decision-Making Reality

Top 3 things clients actually care about:

1. **Trust & reliability**
   → "Will this firm deliver what they promise?"
   → timelines, execution capability, coordination
2. **Design quality + uniqueness**
   → "Will my project stand out or feel generic?"
   → especially for HNIs, hospitality, developers
3. **Budget control & practicality**
   → "Will this design stay within financial reality?"
   → fear of overdesign or impractical ideas

Common objections / concerns:

- “Will the design be too complex or expensive to execute?”
- “Can they handle large-scale / technically demanding projects?”
- “Will timelines stretch because of design iterations?”
- “Are they practical enough or too design-focused?”

Why clients choose Metaphors:

- Ability to **translate abstract ideas into buildable design**
- Strong **balance of creativity + technical depth**
- Proven experience across **diverse project types**
- **Personal involvement** of senior leadership (especially Anand Bhagat)
- Designs that feel **unique, contextual, and non-repetitive**

Why you lose projects:

- Perceived as **premium / not the lowest-cost option**
- Clients wanting **fast, template-based solutions**
- Developers prioritizing **speed & cost over design depth**
- Some clients find the process **too thoughtful (time-consuming)**

1.3 Market Differentiation

“I should hire Metaphors instead of [competitor] because…”

“…they don’t impose a style—they understand my project and create something that actually belongs to it.
They think deeply, but also know how to execute.
I won’t get a copy-paste design.”

What can you deliver that most Indian firms cannot?

- Ability to **work across radically different styles without losing identity**
- Deep integration of:
    - **architecture + interior + experience**
- Strong **concept-to-execution continuity**
- **Context-driven design**, not template-driven
- Sensitivity to:
    - climate
    - culture

    - user psychology
- Handling **complex structural and spatial challenges** (like large spans, voids, experiential planning)

Projects competitors send your way:

- Design-heavy or **conceptually complex projects**
- Projects requiring **strong spatial experience (not just planning)**
- Clients who want **non-generic, identity-driven architecture**
- Hospitality / experiential / high-end residential projects

1.4 Budget Reality Check

Smallest project you'd take:
₹50L – ₹75L (selectively, if design intent is strong)

Most common project range:
₹2Cr – ₹25Cr+

Largest projects delivered:
₹100Cr+ (campuses / large developments)

Does the website need to filter out small enquiries?

Yes — we want to filter low-serious or misaligned enquiries
(but not discourage meaningful small projects)

IMPORTANT (Strategic Insight for You)

This section reveals your positioning clearly:

👉 You are **NOT**

- mass-market
- volume-based
- cost-driven

👉 You are:

- **thinking-led**

- **experience-driven**
- **premium but not flashy**
- **deep design + real execution**

🔹 **Confirm / adjust:**

1. Are these % splits roughly correct? (even instinctively)
2. Do you want to push **hospitality + HNI more strongly?**
3. Minimum project size — should we raise it to filter better?

Once you confirm, I'll:
👉 Fill **SECTION 2 (Project Selection)** — this is VERY critical for your website conversion.

If answer is :

4. Are these % splits roughly correct? (even instinctively) - Yes
5. Do you want to push **hospitality + HNI more strongly?- Yes**
6. Minimum project size — should we raise it to filter better?- as mentioned above - is correct

Then :

SECTION 2 (REFINED — TRUE TO YOUR DATA & THINKING)

2.1 Portfolio Direction (Corrected Understanding)

Your strongest, most authentic positioning comes from:

1. Experiential Hospitality (Signature Strength)

- Corinthians Club
- Boutique Hotel
- Limban
- Ambrosia

👉 This is where your **philosophy is most visible**

---

2. Institutional / Corporate with Spatial Thinking

- Oracle Office
- Cosmos Bank
- IT Campuses

👉 Not just scale—but **redefining typologies**

---

3. High-End Residential (Evolved Phase of Anand)

- Villas
- Private homes

👉 More recent, more personal, more design-sensitive

⚠️ Key Correction from Previous Draft:

Earlier I treated categories equally.

👉 But reality is:

- **Hospitality + Experiential = your strongest storytelling**
- Corporate = **credibility layer**
- Residential = **future growth + premium direction**

2.2 Project Selection Matrix (REWRITTEN — CLEAN + SHARP)

(Only strongest, non-repetitive, philosophy-driven picks)

Project 1

Project name: Corinthians Club
Sector/type: Hospitality / Experiential
Location: Pune
Completion year: Early 2000s

Client type: Hospitality

Project value: ₹50Cr+

Why this project matters:
A landmark project that defines Metaphors' approach—**architecture emerging from landscape**, responding to contours, creating identity through form, not façade.

Client outcome/testimonial: Likely available
Photo quality: Excellent

Project 2

Project name: Corinthians Boutique Hotel
Sector/type: Hospitality
Location: Pune

Project value: ₹20Cr–₹40Cr

Why this project matters:
Demonstrates ability to **insert new architecture into an existing narrative**—balancing individuality with continuity.

Client outcome/testimonial: Unknown
Photo quality: Good

Project 3

Project name: Limban Resort
Sector/type: Eco Hospitality
Location: Maharashtra

Project value: ₹15Cr–₹30Cr

Why this project matters:
Pure expression of **nature-integrated, sustainable design thinking**—not applied sustainability, but inherent.

Client outcome/testimonial: Likely
Photo quality: Excellent

Project 4

Project name: Hotel Ambrosia (Redevelopment)
Sector/type: Hospitality / Adaptive Reuse
Location: Pune

Project value: ₹10Cr–₹25Cr

Why this project matters:
Shows sensitivity to **time, memory, and existing character**—not redesign, but reinterpretation.

Client outcome/testimonial: Unknown
Photo quality: Needs reshoot

Project 5

Project name: Oracle Office
Sector/type: Corporate / IT
Location: Mumbai

Project value: ₹100Cr+

Why this project matters:
A strong example of **technical ambition + human response**—voids, open decks, breathing spaces in high-density work environments.

Client outcome/testimonial: Unknown
Photo quality: Good

Project 6

Project name: Cosmos Bank Headquarters
Sector/type: Institutional / Commercial
Location: Pune

Project value: ₹50Cr+

Why this project matters:
Reimagines a rigid typology into an **inclusive, approachable public space** using courtyard planning and spatial layering.

Client outcome/testimonial: Unknown
Photo quality: Good

Project 7

Project name: IT Campuses (Multiple Projects)
Sector/type: Corporate / Infrastructure
Location: Pan India

Project value: ₹100Cr+

Why this project matters:
Establishes Metaphors' ability to handle **large-scale, complex, multi-system projects** with consistency.

Client outcome/testimonial: Yes (likely)
Photo quality: Mixed

Project 8

Project name: Private Villas & Residences
Sector/type: High-End Residential
Location: Pan India

Project value: ₹5Cr–₹20Cr

Why this project matters:
Represents Anand Bhagat's **evolved, deeply personal design phase**—each project unique, no repeated language.

Client outcome/testimonial: Yes
Photo quality: Mixed

Project 9

Project name: Livience Aleenta Experience Centre
Sector/type: Residential / Experience Design
Location: Pune

Project value: ₹10Cr–₹20Cr

Why this project matters:
A distilled expression of **sensory architecture**—light, water, material, and emotion working together.

Client outcome/testimonial: Unknown
Photo quality: Excellent

- Remove **generic filler projects**
- Focuse on **projects that express thinking, not just scale**
- Each "Why it matters" now reflects:
    - your philosophy
    - your differentiation

- what a client will *feel*

✅ 2.3 Documentation Status (REALISTIC VERSION)

Answer:
👉 *Some need professional photography*

Clarified version (better to write in doc):

- Legacy landmark projects have usable but **dated photography**
- Recent projects have **good but inconsistent documentation**
- Select key projects require **professional reshoot for positioning**

⚡ CRITICAL INSIGHT (FOR YOU)

Your portfolio is not weak.
But right now it is:

👉 **Under-curated, not under-designed**

The website should show:

- fewer projects
- deeper storytelling
- stronger visual consistency

SECTION 3: Client Psychology & Messaging (Refined for Metaphors)

3.1 The Prospect's Journey

What problem are they trying to solve?

- "I don't want a generic building—I want something that represents me / my brand."
- "I need a designer who can handle complexity without losing clarity."
- "I want this project to be meaningful, not just functional."
- "I need someone who can translate ideas into something real and buildable."

👉 At a deeper level:
They are trying to avoid **regret**—
of building something expensive but forgettable.

What are they worried about?

- Will the design be **too abstract or impractical?**
- Will costs **spiral during execution?**
- Will timelines **get delayed due to design iterations?**
- Will they be **heard and understood**, or overridden?
- Can this firm **actually execute**, not just conceptualise?

👉 Hidden fear:
"Will this look good on paper but fail in reality?"

What would make them trust you within 30 seconds?

- Clear evidence of **real, built work (not just renders)**
- Projects that feel **distinct—not repetitive**
- A tone that is:
  - calm
  - assured
  - not over-selling
- Subtle signals of:
  - **experience (30+ years)**
  - **scale handled**
  - **diversity of work**

👉 Most important:
They should feel:
"These people think before they design."

What would make them click away immediately?

- Overly dramatic or flashy language
- Generic architectural clichés:
  - "innovative solutions"
  - "world-class design"
- Too many projects → **no clarity**
- Too technical without emotional connection
- Or too artistic without practicality

👉 Biggest turn-off:
Lack of depth disguised as design

3.2 Client Testimonials & Social Proof

(You'll need to fill names later—I'll structure this strategically)

Ideal Clients to Feature (Type-wise)

- Corporate (IT / campus client) → speaks about **execution + scale**
- Hospitality client → speaks about **experience + identity**
- HNI residential client → speaks about **personalisation + trust**
- Institutional client → speaks about **functionality + clarity**

Suggested Entries (structure)

Client name: _____ | Project: Corinthians Club | Testimonial: [ ] Yes / [ ] No
Client name: _____ | Project: Oracle Office | Testimonial: [ ] Yes / [ ] No
Client name: _____ | Project: Private Villa | Testimonial: [ ] Yes / [ ] No
Client name: _____ | Project: Cosmos Bank | Testimonial: [ ] Yes / [ ] No
Client name: _____ | Project: Limban Resort | Testimonial: [ ] Yes / [ ] No

---

Quantifiable Outcomes (Important Gap)

Right now, your data is **philosophy-heavy, metric-light**

👉 So best honest answer:

"Limited documented quantitative metrics — needs to be developed"

But you CAN start building:

- Large-scale execution (multi-million sq.ft.)
- LEED Gold certification (Wipro Campus, Pune)
- Long-term client relationships
- Projects across sectors pan-India

3.3 Credibility Markers

Industry awards:
Multiple awards for design excellence (specific list to be compiled)

Professional certifications:
LEED Gold (Wipro Campus, Pune)

Notable clients:

- Wipro
- Oracle
- Cosmos Bank
- SBI(New)
  (others to be added)

Media coverage:
Femina feature + others (to be compiled)

Years in business:
35+ years

Number of projects:
100+ (estimate — confirm internally)

Total area designed:
Multi-million sq.ft. (confirm if possible)

Team size:
35+ professionals

Technology capabilities:

- 3D modelling
- Digital architecture
- Bio-mimicry approaches

MOST IMPORTANT INSIGHT (FOR YOU)

Your clients are **not buying design**.

They are buying:

👉 **Clarity in uncertainty**

👉 **Confidence in complexity**

👉 **A thinking partner, not just a service**

WHAT YOUR WEBSITE MUST DO (CLEAR DIRECTION)

Within first 30 seconds, it should communicate:

- We are **experienced, but not outdated**
- We are **creative, but not impractical**
- We are **calm, not loud**
- We design with **thought, not trends**

SECTION 4: Services & Capabilities (Structured + Premium)

4.1 Service Offerings (In Order of Importance)

1. **Architectural Design (Core Practice)**
2. **Interior Design (Integrated with Architecture)**
3. **Master Planning & Campus Design**
4. **Hospitality & Experiential Design**
5. **High-End Residential Design**
6. **Institutional & Healthcare Design**
7. **Design Development & Execution Support**

🔷 Service Breakdown (Client-Facing Clarity)

---

1. Corporate & Commercial Architecture

Who it's for:
Real estate developers, corporates, IT companies, institutions

What's included:

- Concept design
- Master planning
- Design development
- Working drawings & documentation
- Coordination with consultants
- Site involvement & execution guidance

Typical timeline:
18–36 months

Starting from:
₹2Cr+ project value

---

2. Hospitality & Experiential Design

Who it's for:
Resorts, hotels, clubs, retreat spaces, experience centres

What's included:

- Concept creation (experience-led)
- Architecture + interior integration
- Landscape integration
- Material & spatial storytelling
- Guest experience planning

Typical timeline:
12–30 months

Starting from:
₹10Cr+ project value

---

3. High-End Residential Design

Who it's for:
High-net-worth individuals, private clients

What's included:

- Personalised concept development
- Architecture + interiors
- Material selection
- Spatial detailing
- Close client collaboration

Typical timeline:
12–24 months

Starting from:
₹5Cr+ project value

---

4. Institutional & Healthcare Design

Who it's for:
Hospitals, campuses, public institutions

What's included:

- Functional planning
- User-flow design
- Bioclimatic & environmental strategies
- Technical coordination
- Long-term usability planning

Typical timeline:
18–36 months

Starting from:
₹20Cr+ project value

---

5. Master Planning & Large-Scale Developments

Who it's for:
Developers, industrial clients, large campuses

What's included:

- Site analysis
- Zoning & infrastructure planning
- Phasing strategies
- Integration with environment & movement systems

Typical timeline:
Varies (6–18 months planning phase)

Starting from:
₹50Cr+ project scale

---

6. Interior Design (Integrated)

Who it's for:
All project types (as part of architecture or standalone selectively)

What's included:

- Spatial detailing
- Material palette

- Furniture & lighting design
- Execution drawings

Typical timeline:
6–18 months

Starting from:
₹50L+

KEY POSITIONING (IMPORTANT)

👉 You are **not selling services**
You are offering:

End-to-end design thinking with execution clarity

So internally:

- keep services structured
- but externally:
  👉 communicate as **"integrated design approach"**

4.2 Process Transparency (Very Important for Trust)

This is where you differentiate massively.

Stage 1: Understanding & Brief Development

Duration: 2–4 weeks

What happens:

- Client discussions
- Site study
- Understanding aspirations, constraints, intent

Stage 2: Concept Design

Duration: 4–8 weeks

What happens:

- Initial design direction
- Spatial ideas
- Massing, form, and experience

Stage 3: Design Development

Duration: 8–16 weeks

What happens:

- Refinement of design
- Integration with structure, services
- Material exploration

Stage 4: Detailed Design & Documentation

Duration: 12–24 weeks

What happens:

- Working drawings
- Technical coordination
- Execution-ready detailing

Stage 5: Execution & Site Coordination

Duration: Project-dependent

What happens:

- Site visits
- Design supervision
- Coordination with contractors & consultants

Stage 6: Completion & Handover

Duration: Final phase

What happens:

- Final detailing
- Quality checks

- Project closure

WHAT MAKES THIS SECTION POWERFUL

This answers client fears directly:

- “Will they guide us?” → YES (clear process)
- “Will it be chaotic?” → NO (structured stages)
- “Will they disappear after design?” → NO (execution involvement)

STRATEGIC NOTE FOR YOU

Most architecture websites:
❌ confuse clients with too many services

You:
✅ simplify into **clear entry points**

- Corporate
- Hospitality
- Residential

👉 That alone increases conversion.

SECTION 5: Team & Expertise

⚡ Positioning Approach

- **Anand Bhagat → Present voice & leadership**
- **Late Amala Sheth → Foundational philosophy & legacy**
- **Team → Continuity & strength**

5.1 Key Personnel

Person 1 (Founder & Legacy)

Name & designation:
Amala Sheth — Founder

Years of experience:
25+ years of practice

Key expertise/specialisation:

- Integration of **art, science, and architecture**
- Cultural and philosophical grounding in design
- Conceptual thinking rooted in **music, rhythm, and structure**

Notable contribution:
Co-founded Metaphors and established its core philosophy:

> "We explore every aspect of the symbiotic relationship between form and function, the metaphysical relationship between mind and matter…"

Her work laid the foundation for a design approach that is:

- deeply reflective
- culturally rooted
- and intellectually rigorous

Education/credentials:
Sir J.J. College of Architecture, Mumbai

Professional photo available?:
Yes

Person 2 (Principal & Current Lead)

Name & designation:
Anand Bhagat — Founder & Principal Architect

Years of experience:
30+ years

Key expertise/specialisation:

- Conceptual architecture
- Experiential design
- Cross-sector design thinking
- Translating abstract ideas into buildable form

Notable projects led:

- Corinthians Club, Pune
- Oracle Office, Mumbai
- Cosmos Bank Headquarters
- Multiple IT campuses & private residences

Education/credentials:
MM College of Architecture, Pune

Professional photo available?:
Yes

Person 3

Name & designation:
Vanita Mali — Senior Architect

Years of experience:
22+ years

Key expertise/specialisation:

- High-end residential
- Luxury villas & resorts
- End-to-end project execution

Person 4

Name & designation:
Manoj Rathod — Senior Architect

Years of experience:
21+ years

Key expertise/specialisation:

- Commercial & institutional design
- Master planning
- Healthcare & education spaces

Person 5

Name & designation:
Pauravi Mahajan-Pawar — Interior Design Lead

Years of experience:
21+ years

Key expertise/specialisation:

- Interior architecture
- Material-driven design
- Luxury residential & commercial interiors

Person 6

Name & designation:
Kanaka Bhosale — Interior Architect

Years of experience:
10+ years

Key expertise/specialisation:

- Corporate & institutional interiors
- Space planning for productivity & wellbeing

Person 7

Name & designation:
Mayur Kamble — 3D Visualization Lead

Years of experience:
14+ years

Key expertise/specialisation:

- Design visualization
- Concept rendering
- Client communication through visuals

🔷 Metaphors as a Studio (Add this below team)

Metaphors functions as an open, collaborative design environment—envisioned by Amala Sheth and Anand Bhagat as a space where ideas are constantly explored, questioned, and refined.

It operates as:

- an **open forum for design thinking**
- a **multi-disciplinary studio**
- a **collective of specialised individuals**

Each project is led by a **dedicated senior associate and team**, ensuring:

- clarity in communication
- continuity in design
- and a deeply engaged process from concept to execution

🔷 Design Method (Your Technical Strength)

Every project at Metaphors is approached through a **rigorous and layered process**, taking into account:

- Location and topography
- Climate and environmental response
- Movement systems and traffic flow
- Infrastructure and utilities
- HVAC, electrical, and communication systems
- Safety and security standards
- User-specific behavioural and functional needs

👉 Result:
Designs that are not only expressive—but **deeply resolved and buildable**

⚡ WHY THIS WORKS (IMPORTANT)

This structure achieves balance:

- Amala Sheth → **philosophy, depth, origin**
- Anand Bhagat → **continuity, evolution, leadership**
- Team → **execution, stability, scale**

👉 No emotional overstatement
👉 No omission of legacy
👉 No confusion about present leadership

🎯 STRATEGIC INSIGHT

Very few firms can say:

- **Founded on philosophy (Amala)**
- **Sustained through evolution (Anand)**
- **Executed through long-term team stability**

👉 This is your real brand.

SECTION 6: Conversion Goals & Lead Qualification

6.1 What Actions Do You Want Visitors to Take? (Ranked)

1. **Fill out detailed project enquiry form** ✅ *(Primary filter for serious clients)*
2. **WhatsApp message** *(quick, secondary touchpoint)*
3. **Call the office directly** *(for immediate conversations)*
4. **Email enquiry** *(formal communication channel)*
5. **Visit the office** *(high-intent clients)*
6. **Download capability/profile document** *(optional, future addition)*
7. **Follow on social media** *(lowest priority, brand layer)*

⚡ Strategy Behind This (Important)

- **Form first → filters seriousness**
- **WhatsApp + Call → reduces friction**
- **Visit → signals premium positioning**

👉 This is exactly how a **high-quality design firm should operate**

6.2 Lead Qualification (What You NEED to Know)

To avoid wasting time, your form should capture:

- **Project type / sector**
  (Residential / Hospitality / Commercial / Institutional)
- **Project location**
- **Budget range** ✅ *(very important filter)*
- **Timeline / urgency**
- **Project stage**
  (Concept / Planning / Approvals / Ongoing)
- **Decision-making authority**
  (Owner / Developer / Consultant / Other)
- **How they found you**
- **Brief project description** *(open text)*

Budget Filter (Recommended)

Yes — include ranges:

- Under ₹50L *(optional — or remove if you want stricter filtering)*
- ₹50L – ₹2Cr
- ₹2Cr – ₹10Cr
- ₹10Cr – ₹50Cr
- ₹50Cr+

👉 This alone will:

- eliminate non-serious enquiries
- position you as a **premium firm**

6.3 Response Time & Process

What happens after enquiry:

1. Internal review of submission
2. Qualification based on:
   - project type
   - budget
   - seriousness
3. Response via:
   - email or call
4. If aligned:
   - schedule first meeting / discussion

Typical response time:

✅ **Within 24–48 hours**

⚡ IMPORTANT (How this should feel to client)

Not:
❌ “Fill form and wait”

But:
✅ “This is a thoughtful process—these people are selective”

🎯 STRATEGIC INSIGHT

You are NOT trying to get:
👉 more leads

You are trying to get:
👉 **better leads**

🔷 UX NOTE (Very Important for Website)

Your contact section should feel:

- minimal
- calm
- intentional

Not cluttered with too many options at once.

👉 Suggested flow:

1. **Primary CTA:** “Start Your Project” → form
2. Then:
    - WhatsApp
    - Call
    - Email

- Visit

SECTION 7: Competitor Intelligence

7.1 Direct Competitors (Actual Market Reality)

Global / Aspirational Benchmarks

- Bjarke Ingels Group : https://big.dk/
- Aedas : https://www.aedas.com/
- Populous : https://populous.com/
- Sameep Padora & Associates : https://sp-arc.net/
- Ant Studio : https://ant.studio/

👉 These influence **perception + aspiration**, not direct competition in most projects.

Design-Led / Conceptual Indian Benchmark

Tao Architecture : https://taoarchitecture.com/

What they do well:

- Strong conceptual clarity
- Clean, contemporary design language
- Good brand perception

Where they are limited:

- More **design-language driven**
- Less legacy depth and cross-sector scale

How you're different:

- More **philosophical + layered thinking**
- Wider **typology range + execution experience**

Primary Local / Regional Competitors (REAL BATTLEGROUND)

Dhiraj Bhumkar (Studio): https://www.atelieroffice.com/

What they do well:

- Strong local presence
- Practical execution
- Developer-friendly approach

What they do poorly:

- Limited conceptual depth
- More **market-driven than design-driven**

Your edge:

- Stronger **design thinking + identity creation**

SPAZIO : https://spazioliving.com/

What they do well:

- Clean interiors
- Contemporary styling

What they do poorly:

- More **interior-focused**
- Limited architectural depth

Your edge:

- **Architecture + interiors as one system**

VK:A Architecture: https://vkarch.com/

What they do well:

- Urban-scale thinking
- Structured practice

What they do poorly:

- Can feel **formal / standardised**

Your edge:

- More **experiential + human-centric approach**

---

iNFINITY (Sanam & Ajinya Dhumal): https://www.infinitydesign.in/ (Good website)

What they do well:

- Younger, contemporary design
- Visual appeal

What they do poorly:

- Limited legacy
- Less experience in complex or large-scale projects

Your edge:

- **Depth, maturity, and execution capability**

Imago : https://imago.ie/
https://www.imagoarchitects.com/ international
https://imagointerior.com/about-us/ kuala lumpur

What they do well:

- Design sensibility
- Selective projects

What they do poorly:

- Limited scale and diversity

Your edge:

- **Range + consistency across sectors**

Soul Architectural Studio: https://soularchitecturalstudio.com/

What they do well:

- Boutique approach
- Design sensitivity

What they do poorly:

- Smaller scale
- Limited technical depth

Your edge:

- **Stronger infrastructure + technical integration**

Tejomaya Architects: https://tejomayadesigns.com/

What they do well:

- Practical architecture
- Local execution

What they do poorly:

- Less differentiation in design

Your edge:

- **Distinct identity-driven architecture**

CCBA Designs : https://www.ccba.in/

What they do well:

- Functional projects
- Market adaptability

What they do poorly:

- Less conceptual clarity

Your edge:

- **Thought-driven, non-generic design**

YOUR TRUE COMPETITIVE POSITION (VERY CLEAR NOW)

You are positioned:

👉 Above most local firms in **thinking, depth, and experience**
👉 More grounded than global firms
👉 More evolved than younger studios

🔷 Your Unique Position (This is GOLD)

“A legacy-driven, design-led practice that combines philosophical depth with real-world execution.”

7.2 What Your Website Must Emphasise (To Win)

---

1. Depth over styling

Most competitors:
→ design “how it looks”

You:
→ design **how it works + feels + evolves**

---

2. Experience without arrogance

- 30+ years
- 100+ projects

But communicated as:
👉 quiet confidence

---

3. Thinking-led process

Show:

- how you arrive at design
- not just final output

---

4. Architecture, not just interiors

Many competitors lean toward:
→ interior styling

You:
→ **full spatial thinking**

---

5. Non-repetitive design

Position strongly:

👉 “We don’t have a signature style—
we have a way of thinking.”

---

6. Capability + sensitivity

- Large campuses
- Small villas
- Resorts

👉 Same depth across all

🎯 FINAL STRATEGIC LINE

When a client compares:

- Local firms → feel **limited / repetitive**
- Global firms → feel **detached / generic**

👉 Metaphors should feel:

“Thoughtful, experienced, and deeply invested in the project—not just delivering it.”

SECTION 8: Brand & Tone

8.1 Brand Personality

How should prospects perceive you? (Selected)

✔ Reliable / trustworthy
✔ Experienced / established
✔ Large-scale / capable
✔ Technical / precise
✔ Premium / luxury

⚡ Why these (important clarity)

- You are **not trying to look trendy or experimental**
- Your strength is:
  - depth
  - experience
  - execution
  - clarity

👉 “Design-led/creative” is already implied—doesn’t need to be stated

---

8.2 Tone of Voice

Selections:

✔ **Confident** (not humble)
✔ **Professional** (not conversational)
✔ **Technical** (but controlled—not heavy jargon)
✔ **Formal** (but not stiff)
✔ **Authoritative** (not overly collaborative in tone)

⚡ Tone Definition (simple rule)

👉 Speak like:
a senior architect explaining clearly—not a marketer selling

❌ Words/Phrases that should NEVER appear

- “Innovative design solutions”
- “World-class architecture”
- “Cutting-edge”
- “Transforming spaces”
- “Dream spaces”
- “Luxury living redefined”
- “State-of-the-art”
- “Unique blend of form and function”
- “Passion for design”

👉 If it sounds like every other firm—it’s out.

8.3 Visual Direction

Projects that represent your aesthetic best:

- Corinthians Club, Pune
- Oracle Office, Mumbai
- Limban Resort
- Livience Aleenta (experience-driven work)

👉 These reflect:

- scale + identity
- materiality
- spatial experience
- non-generic design

Reference websites you admire

(Aligned with your Apple-like, minimal direction)

- Apple (global website)
- Bjarke Ingels Group
- Aesop *(for calm minimal tone)*
- Tao Architecture

👉 Key takeaway:

- minimal
- controlled
- high-quality visuals
- less text, more intent

Reference websites in your sector that are terrible

(General patterns based on your competitors)

- Overcrowded project grids
- Too many renders, no real photos
- Heavy text with no structure
- Loud graphics / animations
- Generic language everywhere

👉 Typical issues seen in:

- Many regional architecture firm websites
- Interior-heavy studios with Instagram-style layouts

SECTION 9: Technical & Operational

9.1 Content Management

After launch, who will update the website?

✔ **Internal marketing team**

How often will you add new projects?

✔ **Quarterly**

👉 Realistic + sustainable

Do you need to update other content regularly?

✔ **Yes—occasionally**

- Awards
- Team updates
- Selected news/features

9.2 Integration Requirements

✔ **Google Analytics / tracking**
✔ **WhatsApp Business (click to chat)**
✔ **Social media links (not heavy feeds)**

Optional (future—not immediate):

- CRM system → *Not required currently*
- Email marketing → *Not required currently*
- Calendar booking → *Not required (you prefer controlled meetings)*

9.3 Languages

✔ **English only**

👉 Correct for:

- premium positioning
- clarity
- Consistency

SECTION 10: Success Metrics

10.1 Current Website Performance : https://metaphors-design.com/

Do you know your current website's:

Monthly visitors: 1,000 – 5,000
Small–mid architecture studios typically fall in this range unless heavily investing in SEO/ads
Your site is more **portfolio-led, not SEO-driven**, which limits traffic scale

Enquiries per month: 5 – 20
Based on industry avg: ~0.5%–2% of visitors convert to enquiry
High-ticket services (architecture/interiors) naturally have **low but high-quality leads**

Conversion rate: 0.5% – 1.5%
Typical for design firms without strong funnels
Could go up to **3–5%** with better CTA + landing pages

Most visited pages: Home, Portfolio, About, Contact
This is standard for architecture websites:
People come → see work → check credibility → then contact

Primary traffic sources: Direct(40–60%) , Social (20–30%), Search (low)(10–25%), Referral (5–10%)

Reality Check (Important)

Your website is currently:

> **A portfolio showcase, not a lead engine**

And that's why:

- Traffic is limited
- Conversions depend on offline reputation

What This Means (Strategically)
If you want:

🔹 More leads → You need:

- SEO pages like:
  - "Luxury bungalow architects in Pune"
  - "Best interior designers for villas"
- Case study pages (not just images)

🔹 Higher conversion → You need:

- Strong CTA (Book consultation / Schedule call)
- Lead magnets (download brochure, project PDF)
- Clear positioning (premium vs boutique vs large-scale

If you don't have this data:

- ☑ We need to set up analytics before we start
- ☐ We don't track this
- ☐ We track it but don't have access to the data

10.2 Success Definition
6 months after launch, what would make this website rebuild a success?

(Be specific: number of enquiries, quality of leads, conversion rate, brand perception, etc.)

1. Generating **25–40 qualified enquiries per month** (focused on serious residential, hospitality, and premium clients)
2. Achieving a **conversion rate of 2–4%** from website visitors to enquiries
3. Increase in **high-value projects** rather than just volume (better client quality)
4. Website becoming a **primary credibility tool** during client decision-making
5. Stronger **brand perception as a premium, design-led, and thoughtful architecture studio**
6. Improved visibility on Google for relevant searches (e.g., architecture + interiors in your category)
7. Consistent traffic growth driven by **organic search + social media integration**

What would make it a failure?

- Less than **10 enquiries per month** after 6 months
- Majority of leads being **low-budget or misaligned clients**
- Conversion rate staying below **1%**
- Website still functioning only as a **static portfolio instead of a lead generator**
- No measurable increase in **brand perception or inbound opportunities**
- Low engagement (users visit but don't explore projects or take action)
- Continued dependence on **offline referrals instead of digital growth**

SECTION 11: Project Logistics

11.1 Timeline Expectations

When do you need this website live?
2–3 months *(balanced approach: quality + speed)*

Are there any date constraints?
- Targeting alignment with upcoming **brand positioning and social media growth push** *(flexible, but preferred to launch alongside a stronger digital presence rollout)*
- Photoshoots pending

11.2 Decision-Making

Who needs to approve:

- **Overall strategic direction:** Anand Bhagat (Principal Designer)
- **Content/messaging:** Core team + marketing/social media team
- **Visual design:** Anand Bhagat + senior design team
- **Project selection:** Core architectural team
- **Final launch:** Anand Bhagat

How many rounds of revisions do you typically need?
3–5 rounds *(to ensure refinement and alignment with design philosophy)*

11.3 Budget Considerations

- **Professional photography (if needed):** Selective investment for key projects (priority-based)
- **Copywriting/content creation:** Moderate budget (focused on high-quality storytelling and positioning)
- **Video/drone footage:** Selective—used for flagship projects and brand-building
- **Ongoing maintenance:** Basic monthly allocation for updates and technical upkeep
- **Digital marketing/SEO:** Planned investment post-launch to drive traffic and lead generation

---

SECTION 12: Open Questions

What haven't we asked about that's important to you?

- How the website can evolve as a **long-term brand platform**, not just a one-time launch
- Ensuring the site reflects our **design philosophy, thinking process, and intent**, not just final visuals
- How digital presence (website + social media) can work together as a **cohesive ecosystem**
- The ability to **easily update and scale content** as new projects and ideas emerge

---

What are your biggest concerns about this website project?

- The website becoming **generic or similar to other architecture studios**
- Over-emphasis on visuals without communicating the **depth of thought and process**
- Attracting **misaligned or low-quality enquiries**
- Lack of clarity in messaging leading to **weak positioning**
- The final output not fully capturing the **true essence of the studio's work and values**

If this website could accomplish ONE thing above all else, what would it be?

To position the studio as a **thoughtful, design-led, and highly intentional practice**, attracting the **right kind of clients and projects**—not just more enquiries, but **better, more meaningful opportunities**

metaphors
beyond art and architecture

Last Point:

Are you open for any alteration of your logo? It has fallen out of time and the slogan is no more contemporary and should not be part of a logo. I've made that back in the day in under 10min. Today I advise an improvement - without removing the zest of it.

Answer:
Anand Bhagat :
Core Team:

Next Steps

Once completed:

- ☐ Return this document to Mark
- ☐ Gather supporting materials (photos, logos, testimonials, brand guidelines)
- ☐ Send it over for review and clarify responses
- ☐ Begin content development and site architecture planning
- ☐ I will meanwhile work gathering typical client psychological understanding of what drives conversion and start conceptionaling a website structure, theme and design elements.

Estimated completion time for this questionnaire: 3-4 hours

Can be completed in stages—delegate sections to relevant team members
